| These policy forms contain the NAIC prescribed standardized benefit packages with no new or innovative benefits. |
| These policy forms are guaranteed renewable for life, subject to the Company's right to change premiums by class. |
| Active policy forms are marketed using captive, salaried and licensed agents who interact with consumers primarily by telephone, mail or internet. Our agents are dedicated salaried employees who do not receive any commission. |
| This is a closed block. |
| The majority of policies sold do not undergo underwriting for one of the following reasons: Policies sold within six months of a beneficiary enrolling in Medicare Part B are not subject to underwriting. Policies sold to beneficiaries who are eligible under guarantee issue regulations are not underwritten. |
| |

This policy uses limited underwriting when none of the conditions stated above apply. All underwriting questions require a yes/no response.

All applicants are allocated to the smoker or non-smoker class dependent upon their answer to the application's smoking question.

Exposures Since Inception and Current In-Force Counts

Exhibit 2 contains Rhode Island and nationwide totals by plan for policies in-force as of 9/30/2016 as well as life years exposed by calendar year through 9/30/2016.

Historical Incurred Claims and Earned Premium

Exhibit 3 contains historical experience by calendar year, duration, and plan for both Rhode Island and nationwide through 9/30/2016 with claims runout through 10/31/2016.

| Loss Ratio Projection | | | | | | |
|------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|--|--|--|
| Definition of Loss Ratio | The loss ratio is calculated as incurred claims divided by earned premiums. Incurred claims include only paid claims and liabilities for unpaid claims. Earned premiums include modal loadings. Active life reserves are excluded from the calculation. | | | | | |
| Current Target Lifetime Loss Ratio | 77% | | | | | |
| Minimum Required Loss Ratio | 65% (3rd Year, Future, and Lifetime) | | | | | |
| Base Period | Actual experience for Rhode Island is from the 12 month period 10/1/2015 to 9/30/2016 with claims runout through 10/31/2016. The manual rate is based upon nationwide experience for 1/1/2014 to 12/31/2014 trended forward to the same period as the actual experience. | | | | | |
| Projection Period Start Date | 10/1/2016 | | | | | |
| Experience Basis | State and nationwide data was used to develop the projections. Incurred claims include an estimate for unpaid claims with claims assumed complete after 24 months. | | | | | |
| Methods and Assumptions | The method and assumptions used to develop the loss ratio projections are the same as those used to determine rates. | | | | | |
| Projections | The resulting Rhode Island and nationwide loss ratio projections can be found in Exhibit 4. | | | | | |

Exposures Since Inception and Current In-Force Counts

Exhibit 2 contains Rhode Island and nationwide totals by plan for policies in-force as of 9/30/2016 as well as life years exposed by calendar year through 9/30/2016.

Historical Incurred Claims and Earned Premium

Exhibit 3 contains historical experience by calendar year, duration, and plan for both Rhode Island and nationwide through 9/30/2016 with claims runout through 10/31/2016.

Incurred claims include an estimate for unpaid claims with claims assumed complete after 24 months.

| Loss Ratio Projection | |
|------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Definition of Loss Ratio | The loss ratio is calculated as incurred claims divided by earned premiums. Incurred claims include only paid claims and liabilities for unpaid claims. Earned premiums include modal loadings. Active life reserves are excluded from the calculation. |
| Current Target Lifetime Loss Ratio | 77% |
| Minimum Required Loss Ratio | 65% (3rd Year, Future, and Lifetime) |
| Base Period | Actual experience for Rhode Island is from the 12 month period 10/1/2015 to 9/30/2016 with claims runout through 10/31/2016. The manual rate is based upon nationwide experience for 1/1/2014 to 12/31/2014 trended forward to the same period as the actual experience. |
| Projection Period Start Date | 10/1/2016 |
| Experience Basis | State and nationwide data was used to develop the projections. Incurred claims include an estimate for unpaid claims with claims assumed complete after 24 months. |
| Methods and Assumptions | The method and assumptions used to develop the loss ratio projections are the same as those used to determine rates. |
| Projections | The resulting Rhode Island and nationwide loss ratio projections can be found in Exhibit 4. Projected durational loss ratios are reported in Exhibit 5. |
