#### C. Rate Methodology/Assumptions

1. General Method – Projections used in developing the 2015 rates are shown in Attachment 1. Based on the historical claim patterns, per member per month claim costs are developed by benefit and trended to the end of the 2015 rating period. (Also see Attachment 3).

Projected claim costs for 2014 and 2015 are calculated from the grouped experience for plans B through G (for those plans) and plans H through J (for those plans). Plans A, K and L are based on the grouped experience of the other Standardized Medicare Supplement Plans and their own experience.

Rates are based on state of residence. When notification of change of residence is received, rates are adjusted accordingly.

Expense per member per month costs are calculated to reflect the anticipated expenses, risk and profit margin, premium taxes, and marketing expenses.

- 2. Priced with Trend/Selection Claim cost trends are projected for 2014 and 2015. The trend assumptions are based on the historical experience of the AARP Medicare Supplement Plans in your state and include selection.
- 3. Priced with Rate Increases Rates are calculated to be sufficient through 2015. We anticipate future annual rate increases similar to future medical trend levels for most plans. For some plans future annual rate increases may be different than future medical trends in order to increase or decrease future loss ratios to target levels over time.
- 4. Commission Rate First year commissions will be paid up to \$500 per enrollment. Renewal commissions will be paid up to \$500 per year. Renewal commissions will be paid for years two through six. Additional incentives may be paid up to \$150 per enrollment.

Replacement commissions will be paid at the renewal rate.

- 5. Lapse Assumption Lapse assumptions are based on actual AARP Medicare Supplement experience in your state. For 2014 and 2015, the assumed annual lapse rates (including death) are 7.6% and 6.9%, respectively.
- 6. Morbidity Assumption Morbidity assumptions are based on actual AARP Medicare Supplement Plans experience in your state and are incorporated into the trend projections and base claim costs.
- 7. Interest Assumption -5.0%.
- 8. Pre-Funding These plans are community rated. The rates are projected to be effective until December 31, 2015 and reflect no pre-funding.

#### D. Scope/Reason for Request

- 1. Overall increase The overall increase is 0.04%.
- 2. Variations by Cell The requested rate increases vary by plan. Refer to the enclosed Rate Schedule.
- 3. Effective Date January 1, 2015.
- 4. Timing These plans are rated on a calendar year basis. For 2015, we propose to defer the rate revision until April 1, 2015, and have rates effective through December 31, 2015.

#### E. Rates and Rating Factors

- 1. Current See Rate Schedule.
- 2. Proposed See Rate Schedule.
- 3. Period Rates Apply Effective January 1, 2015.
- **F.** Average Annualized Premium \$2,413. See Attachment 4 for 2015 annualized premiums by plan.
- **G.** Rate History See Attachment 5.
- **H.** Average Lives Attachment 1 shows AARP Medicare Supplement experience.
- **I. Historical Incurred Claims** Attachment 1 shows AARP Medicare Supplement experience.
- **J. Historical Earned Premium** Attachment 1 shows AARP Medicare Supplement experience.

#### K. Loss Ratio Projection

The target lifetime loss ratio for Plans A through J is 75.9% and was filed with the initial policy filing. The target lifetime loss ratio for Plans K and L is 75%.

- 1. Definition Loss ratios are calculated as incurred claims divided by premium.
- 2. Base Period Claim cost projections are based on claim data incurred through 2013.
- 3. Lapse Assumption Lapse assumptions are based on actual AARP Medicare Supplement experience in your state. For 2014 and 2015, the assumed annual lapse rates (including death) are 7.6% and 6.9%, respectively.
- 4. Claim Trend Assumption Claim trend projections are based on actual AARP Medicare Supplement experience in your state and reflect changes made to the Medicare program. See Attachment 3 for projected claim trends.
- 5. Attained Age/Selection Adjustments The loss ratio projections anticipate that increases in claim costs due to aging of current insureds will be offset by continuing enrollment of younger insureds.
- 6. Future Rate Increases We anticipate future annual rate increases similar to future medical trend levels for most plans. For some plans future annual rate increases may be different than future medical trends in order to increase or decrease future loss ratios to target levels over time.
- 7. Interest Assumption -5.0%.

- 8. With and Without Rate Change
  - The anticipated lifetime loss ratio with the rate change implemented on April 1, 2015 is 81.0%.
  - Without a change to the 2014 rate, the anticipated lifetime loss ratio is 81.2%.

#### L. Loss Ratio Demonstration

The anticipated lifetime and future loss ratios for these plans are shown in Attachment 1. After proposed rate actions, the anticipated lifetime loss ratios, future loss ratios and third year loss ratios are greater than or equal to the applicable ratio. For plans with non-credible experience, the combined experience of Standardized plans within your state is used to make this determination.

#### M. Actuarial Certification

I am a member of the Society of Actuaries and a member of the American Academy of Actuaries. I meet the Qualification Standards of Actuarial Opinion as adopted by the American Academy of Actuaries and am qualified to render this prescribed statement of actuarial opinion.

#### 1990 Standardized Plans

This chart gives you a quick look at the standardized Medigap Plans that can be sold for effective dates up through May 31, 2010 (including Medicare SELECT) and their benefits. Insurance companies offering Medigap policies must make Plan A available. Not all types of Medigap policies may be available in each state.

If a checkmark appears in a column of this chart, this means that the Medigap policy covers 100% of the described benefit. If a column lists a percentage, this means the Medigap policy covers that percentage of the described benefit. If a column is blank, this means the Medigap policy doesn't cover that benefit. Note: The Medigap policy covers coinsurance only after you have paid the deductible (unless the Medigap policy also covers the deductible).

Through May 31, 2010 the standardized plans are:
